About Me

Developer-in-training specializing in Python, with knowledge of object-oriented programming, relational databases, and web development. Experience in academic projects (CRUD in Java with MySQL, IoT systems with Arduino, and web development in HTML/CSS/JS) and in teaching programming (Python and Java). I hold a FCE (B2) English certificate. I'm looking to join Python- or web-based software projects as a junior developer.

Experience

Logischool AGO 2023 - current

Programming Teacher

I teach Python and Java programming classes to children and young adults by coding and blocks. I design and adapt practical teaching materials, encouraging logical thinking. I monitor student progress and apply adaptive teaching methods.

Instituto Superior Tecnológico Sudamericano OCT 2022 - SEP 2024

Intern

Experience as an IT assistant: control of equipment in storage, hardware/software diagnosis and repair, basic computer configuration aligned with the institution's needs, and direct user support. Participation in operational tasks that required the institution's equipment.

Education

2025 - current

Python University
Udemy

Intensive Python Course (90+ hours): Advanced programming fundamentals, OOP, GUI and web development (Django, Flask), and database management (SQLAlchemy, MySQL, PostgreSQL).

OCT 2019 – 2025

Instituto Superior
Tecnológico Sudamericano
**Tecnólogo en
Desarrollo de Software**

Software Development Technologist (Higher Level Degree).

JUL 2017

U. E. Gmo Francisco de
Miranda
Bachiller en Ciencias

Venezuelan High School Graduate (Science track)
